SUMMARY

This is a report of forest production in Nova Scotia for the calendar year 1988, based on data collected by the Operations Branch of the Department of Lands and Forests. Compiling, editing, publishing and distribution were done by the Forestry Branch, Forest Resources Planning and Mensuration Division.

The information was collected from producers, processors and buyers of primary forest products. Sawmill firms reported the quantities sawn during the calendar year 1988, whether the wood was purchased, custom-sawn or produced by the mill owners themselves. Roundwood production was obtained from buyers and producers of pulpwood, pit-props, veneer logs and poles and piling. Pit props are included with poles and pilings for aggregation reasons. Sawmill residue chips are excluded for statistical reasons.

Production data are concerned only with wood of Nova Scotia origin. Export wood is NOT included. (See Table 1 Below)

Production is shown as accurately as possible by county of origin. Resawn volumes are omitted to eliminate duplication of data.

The total commercial production, at roundwood level, amounted to 152,635,325 cu.ft. (4 322 147 m^3), solid wood equivalent, down 1.4% from 1987. Sawlog volume increased by 2.8% from 1987, amounting to 38,614,505 cu.ft. (1 093 440 m^3) equivalent. Round products decreased 2.3% to 3 228 707 m^3 equivalent.

Compared to 1986, increases were reported for softwood sawn lumber, hardwood sawn lumber, softwood boxwood, hardwood boxwood, hardwood railway ties, softwood shingles, softwood staves & headings, softwood and hardwood whole tree chips, and softwood pulpwood. Sawmill chips increased but figures are not quoted. All other products had decreased in production from 1987.

The pulp and paper segment of the industry is composed of five mills: a kraft pulpmill at Abercrombie Point; a sulphite pulpmill and newsprint mill at Point Tupper; a newsprint mill at Brooklyn; a paperboard mill at Hantsport and a hardboard plant at East River.

From 1987 to 1988 the total number of firms operating all types of sawmills decreased by three to 360.

The number of firms producing over one million board feet during 1988 was 46, up one from 1987. There were 280 firms producing less than one million board feet per firm, compared to 277 in 1987.

Of the smaller producers, 213 produced 100 Mfbm or less in 1988.

Firms producing over one million board feet per firm accounted for 13% of the number of firms and produced 88% of the lumber and boxwood.

As in previous years, fuelwood - whether in sawmill chip form or stacked - is not reported. Since 1983 whole tree chips have been reported, however, they are for all species and all diameters and are not included in any summary figures.

SUMMARY OF PRODUCER BY TYPE OF SAWN PRODUCT

NOVA SCOTIA - 1988

	1937	1988
Firms producing lumber only	281	284
Firms producing boxwood only	5	5
Firms producing ties only	0	0
Firms producing mine packs only	4	2
Firms producing laths only	23	20
Firms producing shingles only	8	9
Firms producing staves & headings only	3	2
Sub Total	324	322
Firms producing more than one product	39	38
Total No. of Firms	363	360

See "List of Sawmill Owners and Materials Produced - 1988" for further information.

Production statistics by ownership class are included in this publication. Provincial Crown production was obtained from records kept by Department of Lands and Forests. Large Private owners provided data for private ownerships of over 1,000 acres (400 ha) per owner. Small Private ownership production was estimated by subtraction of Crown and Large Private production from the total provided by sawmill and roundwood producers.
